Connecting Blood Donors With Those In Need

VCare Blood Donation App – Complete Knowledge Base Document

🩸 1. Blood Donation Basics

1.1 Who can donate blood?

- Individuals aged 18 to 65 years
- Minimum weight: 50 kg
- Must be healthy
- No active infections
- Must not have donated blood in the last 3 months

1.2 Who should NOT donate blood?

- Fever in the last 7 days
- Recent surgery
- Low hemoglobin
- Pregnancy
- Chronic illness (consult a doctor)

1.3 Donation Interval

- Minimum gap of 3 months between donations

1.4 Blood Group Compatibility

- O- → Universal donor (can donate to all)
- AB+ → Universal recipient (can receive from all)
- A+ → Can donate to A+, AB+
- B+ → Can donate to B+, AB+

1.5 Benefits of Donating Blood

- Saves lives
- Provides a basic health check
- May reduce risk of heart disease
- Burns calories
- Helps in new blood cell production

1.6 Blood Donation Process

1. Registration
2. Medical screening
3. Blood donation (about 10 minutes)
4. Rest and refreshments

1.7 Safety Note

- Blood donation is generally safe
- Always consult a doctor if unsure

📱 2. About the App

VCare is a blood donation platform designed to connect donors and recipients quickly and efficiently.

Purpose of the App

- Help users find blood donors easily
- Enable quick blood requests
- Support emergency situations
- Provide a simple and user-friendly platform

📝 3. User Registration & Login

3.1 How to Register

1. Open the app
2. Click on "Register"

3. Enter:
    - Name
    - Blood group
    - Location
    - Contact details
4. Submit the form

3.2 Login

- Use registered email or mobile
- Enter password to login

🩸 4. Request Blood

4.1 How to Request Blood

1. Go to "Request Blood" section
2. Enter:
    - Blood group (e.g., A+)
    - Location (city)
3. Submit request

4.2 What Happens Next

- The app shows available donors
- Users can:
    - View profiles
    - Contact donors

👤 5. Donor Profiles

Each donor profile includes:

- Name
- Blood group

- Location
- Contact information

How to Contact a Donor

1. Open donor profile
2. Click "Contact"

🔍 6. Finding Donors

Users can search donors by:

- Blood group
- Location

Example

User: "Need A+ blood in Chennai"
Response: Shows matching donors in Chennai

📍 7. Location Support

Supported cities include:

- Chennai
- Mumbai
- Delhi
- Additional cities based on available data

⚠️ 8. Emergency Usage

In urgent situations:

- Search immediately
- Contact multiple donors
- Use hospital services as backup

🧠 9. Chatbot Usage

9.1 What the Chatbot Can Do

- Answer blood donation questions
- Help with app usage
- Assist in finding donors

9.2 Limitations

- Does NOT provide medical diagnosis
- Provides only general guidance

⚠️ 10. Medical Disclaimer

- This information is for general guidance only
- Always consult a qualified doctor for medical advice

❌ 11. Out of Scope

The chatbot will NOT answer:

- General knowledge questions
- Unrelated topics

If asked unrelated questions, respond:
"I can help only with blood donation and app-related queries."

🏥 12. About the Organization

This application is developed for V-CARE Social Service Trust.

The organization focuses on:

- Connecting blood donors with patients
- Supporting medical emergencies
- Promoting voluntary blood donation

👨‍💻 13. About the Developers

Developed by:

- Sarankumar A

- Mohamed Haarish Sherieff M

Mission

To use technology to save lives by improving access to blood donors and making the process faster and more efficient.

⚙️ 14. App Features

1. User Registration and Login
2. Donor Registration
3. Blood Donor Search
4. Donor Profile Viewing
5. Contact Donors
6. Refer a Friend
7. Profile Management

🧬 15. Supported Blood Groups

- A+
- A-
- B+
- B-
- AB+
- AB-
- O+
- O-

🔁 16. How Donor Search Works

When a user requests blood:

1. Identify blood group
2. Identify location
3. Search database

4. Return matching donors

Example

User: "I need A+ blood in Chennai"
Response:

- Rahul – Contact: XXXXX
- Priya – Contact: XXXXX

📏 17. Chatbot Response Rules

- Always prioritize exact blood group
- Always prioritize same location
- If no donors found:
    - Suggest nearby locations
    - Inform politely

Must Include:

- Name
- Blood group
- Location
- Contact (if available)

Restrictions:

- Do NOT generate fake donors
- Use only real data

📊 18. Blood Donation Facts

- Donation allowed every 3 months
- One donation can save up to 3 lives
- O- is universal donor
- AB+ is universal recipient

❓ 19. Frequently Asked Questions (FAQs)

Who can donate blood?

Anyone healthy, aged 18+, weighing at least 50 kg, and not donated in last 3 months.

What are the benefits of donating blood?

- Saves lives
- Free health check
- Reduces heart disease risk
- Burns calories
- Helps blood cell production

What is the blood donation process?

1. Register
2. Medical screening
3. Donation
4. Rest

Which blood types are compatible?

- O- is universal donor
- AB+ is universal recipient

How do I register as a donor?

Go to "Register as Donor", fill details, and submit.

How do I find blood donors?

Use "Find Donors" feature with blood group and location.

How do I refer a friend?

Use "Refer Friend" option in the app.

How do I manage my profile?

Go to "My Profile" to update details and view history.

💬 20. Example Conversations

User: I need O+ blood in Mumbai
Bot:
Here are available O+ donors in Mumbai:

1. Amit – Contact: XXXXX
2. Sneha – Contact: XXXXX

User: Who can donate blood?
Bot:
Any healthy person between 18 and 65 years can donate blood

⚠️ 21. Limitations

- Data depends on registered users
- Donor availability is not guaranteed
- Contact depends on donor response

✅ 22. Conclusion

VCare helps users quickly find blood donors using real data.

The chatbot supports:

- Finding donors
- Answering blood-related questions
- Guiding users in using the app

This document serves as the complete knowledge base for the chatbot to provide accurate and helpful responses.

🤖 Final Chatbot Instruction

If the query is unrelated to blood donation or the app, respond:
"I can help only with blood donation and app-related queries."
